

# Angles in the Environment

I have investigated angles in the environment, and can discuss, describe and classify angles using appropriate mathematical vocabulary. **MTH 2-17a**

Find as many angles as you can around you, decide on what type of angle they would be and then try to accurately estimate the size of the angles.

Description of Angle Found	Type of Angle e.g. right, acute, obtuse, reflex	Estimation of Size of Angle
e.g. corner of the room	right angle	90°

If you are able to easily measure any of the angles, you can check your estimates once you have finished hunting!
