

Project 1 – Geography

We live on such an amazing planet and sometimes I feel as though we don't always learn enough about it.

This week's project, you get to take charge and decide what you are learning about.

I would like you to choose any place on Earth (country, city, town etc.) that you are curious about and find out about it.

Here are some things you can research and find out about your chosen place:

1. Population of the place (how many people live there)
2. What is the climate (weather) like?
3. What types of animals live there?
4. Is your place famous for anything?
5. Are there any famous buildings or sculptures in your area?
6. Is there anybody famous that lives there? What are they famous for?
7. Is any food grown or produced there? Can you use that food in a recipe for dinner?
8. Would you like to visit and why? What attracts people to your area?

It would be great to see what things you end up researching, so you can send in the following on google classroom:

-photos

-Powerpoints

-drawings/notes

-any typed writing or handwritten writing.
